

Mrs. Andrea E. Strange

533 West Linden
Ph.: 4-5836

Coeur d' Alene, Idaho

To avoid disappointment, it is better to telephone or write us before coming in person for your leaves and plants.

To find us (if you are in downtown Coeur d' Alene) drive north on Government Way to Linden Avenue; then turn west three blocks; or come out North on Lincoln Way and you will find us at the corner of Lincoln Way and Linden.

For the benefit of new African Violet fans, a few suggestions are listed below:

1. Use warm water for watering -- much warmer in winter.
2. Do not over-water. When the top soil feels dry, place the pot in a saucer of water and allow it to soak through to the top. Remove at once from the saucer until the next watering.
3. These violets flower best at daytime temperatures of 70-80 degrees and at night at about 60 degrees. However, some variation does no damage.
4. Do not expose them to chills or freezing temperatures as the flowers will drop and the plants may die.
5. Water dropped on the leaves causes ugly spots--- as does direct sunlight. Never get water in the crown.
6. Use strong light for flowering - but no direct sunlight.
7. If you want to go to the trouble, you may place the plants under artificial lights when you have them on at night. If a 100-watt bulb is used, the leaves should be about 15 inches from it. This isn't necessary but will give you more bloom.
8. Do not over-fertilize-- you can burn off the roots and stunt your plant.

People who have seen our plants have asked to buy our soil mixture. It is made of seven ingredients and is sterilized. Mature plants grow in this mixture with no need for other fertilizer for a long period of time. After flowering begins, a little super-phosphate once a month is fine - but even this is unnecessary. This mixture sells for 4 quarts for a \$1.00, plus postage from Coeur d' Alene. You can figure 6 pounds to the 4 quarts. Ask your postmaster for rates to your address from Coeur d' Alene.

Regardless of claims made by anyone, there is no truly "red" African Violet. The so-called reds are really a wine color. The girl-type leaves are heart-shaped (either ruffled, serrated, or plain) usually with a white blotch at the base of the leaf. The flowers described as having a white edge vary considerably in the clearness of this edge; but it is usually quite distinct---especially after the first flowering. The leaves on variegated foliage very often turn plain green again.

We are growing about 500 varieties but will not list some of the older ones. Also, some of the new ones will not be listed because we won't have them in quantity until fall. If you are particularly interested in one you know about, please write me; I may have it. Please enclose postage for personal replies.

It is a good idea to name one or two substitutes in the event that some kinds are sold out. I am listing only fresh cut leaves to sell. My customers write me that the leaves they receive root well and make strong plants. If you are especially interested in small plants of some varieties you might drop me a line. If I have them they would be in the 75 cent and \$1.00 size. Blooming sizes, which I do not keep long, are priced at \$1.50 and \$2.00.

Minimum Order ----- \$3.00

Please add 35 cents for postage and handling charges

These abbreviations will be used throughout this list: fol. --- foliage
dk. --- dark med. --- medium grn. --- green dbl. --- double
lt. --- light flr. --- flower flrs. --- flowers blm. --- bloom

Some bi-colored varieties (Elizabeth the Queen, for example) will sometimes sport to solid color. Even so, they are still beautiful and desirable. Those of this type, known to us, will be marked with an underline.

Some of the new varieties will not be ready for cutting until May. These will be marked with an asterisk.*

As soon as the exciting new double pink with blue border and the new fringed double pinks are released we will have them for you. Also, the Convention introductions.

(List continued from page 6)

- *Betty Fringotto - now ivory-tinted flr, wavy fol
- Dark Waverly - shaded blue rippled flrs, lovely rippled fol
- Windsong - light blue flrs on girl fol, lovely

The first part of the report is a general statement of the work done during the year. It is followed by a detailed account of the various projects and the progress made on each. The report then discusses the results of the work and the conclusions drawn therefrom. Finally, it contains a list of the names of the persons who have been engaged in the work during the year.

The work has been carried out in accordance with the plan laid down at the beginning of the year. It has been found that the progress made has been satisfactory in all respects. The results of the work have been of a high standard and have contributed to the advancement of the science of the day. The conclusions drawn from the work are of great importance and will be of great value to the scientific community.

The following is a list of the names of the persons who have been engaged in the work during the year:

Mr. A. B. C. D. E. F. G. H. I. J. K. L. M. N. O. P. Q. R. S. T. U. V. W. X. Y. Z.
